

PAYMENT SOLUTIONS MADE EASY

MOBILE EFTPOS - PORTABLE SOLUTIONS

The Cadmus Mobile Solution provides your business with advanced technology to receive payment anywhere. Mobile Eftpos provides ultra-portability to bring the payment to the Customer at the time of service.

The lag between the time you have to pay your suppliers and employees and the time you collect from your customer is the problem, and the solution is cash flow management. Cash flow management is important to any business and the key is to delay outlays of cash as long as possible while encouraging anyone who owes you money to pay it as rapidly as possible.

The solution is the Cadmus Mobile which meets all current international security standards and ensures you're receiving payment by connecting anywhere to everyone at the speed of light.

MARKETS

The Cadmus Mobile suits business people who have no fixed abode and allows your business to receive confirmed payment anywhere and at anytime. The payment solution is ideal for many businesses such as plumbers, electricians, beauty therapist, pizza delivery drivers, builders, taxis and even restaurants that can offer payment at the table.

THE BENEFITS OF EFTPOS TO YOUR BUSINESS

- Accepting Debit or Credit cards increases your Customers payment options by offering an alternative to Cash or Cheque
- Allows your business to receive full payment at the time of service and improve cash flow
- Eliminates waiting for payment and ensures that payment is controlled by the person doing the work
- Reduces the security risk of Cash handling and wasting time visiting banks to make deposits
- Removes the need to use non-guaranteed Credit Card zip-zap manual voucher machines

MORE THAN JUST EFTPOS FEATURES AND BENEFITS*

EMV/3DES COMPLIANT - all Cadmus terminals are developed to the latest EMV/3DES network security standards, which enhance payment security and are Chip Card compliant.

ERGONOMIC DESIGN - the large screen and keys have been ergonomically designed for easy PIN entry. Back lighting ensures the screen and keys are easy to read especially in darker environments where Eftpos is used.

THERMAL PRINTER - all Cadmus terminals incorporate high speed quiet thermal printing. They are capable of printing different sized text, images such as company logos and barcodes.

STANDARD FEATURES - purchase, cash out, purchase with cash out, refund, credit or debit cards.

PRE-AUTHORISATION - important for businesses that operate a deposit or bond system as a part of their service offering. Pre-authorisation capability allows you to check validity, funds availability and enables you to place a hold on funds.

TIPPING - important for businesses where customers want to acknowledge good service. The Tipping feature is easy to activate and operate.

MULTI-MERCHANT CAPABLE - this enables multiple business entities to share a single Eftpos terminal.

* Features & benefits may depend on which bank you process with

CHEQUE AUTHORIZATION - protects your business from cheques that bounce.

MANUAL PAN - ideal for phone or mail ordering businesses.

DECLINE ALERT - stops declined transactions and requires merchant intervention.

MULTI-DROPPING - multiple terminals can be installed in an environment where only a single phone line is available. This solution ensures that speed and cost are not compromised.

KEYLINK - this feature enables communication between the Eftpos terminal and many Point of Sale systems. This interfacing solution reduces the chance of human error when conducting transactions.

EXPANDABILITY WITH SECONDARY APPLICATIONS - Cadmus terminals are built with increased memory to allow performance beyond Eftpos services. Secondary applications includes loyalty cards, gift cards, data capture and many more customised applications..

PHONE TOP UP - allows your business to earn extra revenue by topping up prepaid phones & selling calling cards.

CURRENCY SELECT EFTPOS - allows customers to pay in their currency and you earn more revenue.

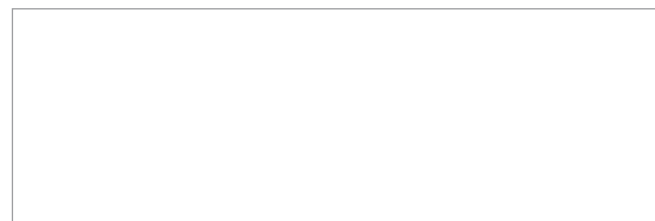

CADMUS MEANS EFTPOS

Cadmus designs, develops and implements innovative point of sale payment solutions, including 'custom branded' products, for businesses in New Zealand, Australia and Asia Pacific.

Full payment and data management solutions are designed for retailers, banks and other organisations. We offer Eftpos and data capture terminals, loyalty, gift card and customer relationship management programs. Plus all Cadmus payment products are now certified to meet the new EMV and 3DES security standards.

To future proof your business call your Cadmus Technology office today.
